Fleet Max

Fleet Max is the flagship of GRIDTRAQ'S GPS/GSM/GPRS fleet management systems. Based on the leading world class technology, Fleet Max provides the most comprehensive, real-time vehicle management system, truly differentiating Fleet Max as a premium management system.

Fleet Max offers technologically advanced features such as high definition tracking, driver scores, collision reports, detailed journey summary reports and route adherence. Fleet Max also allows for the addition of multiple inputs such as driver ID monitors and impact sensors.

A truly comprehensive Fleet Management Solution.

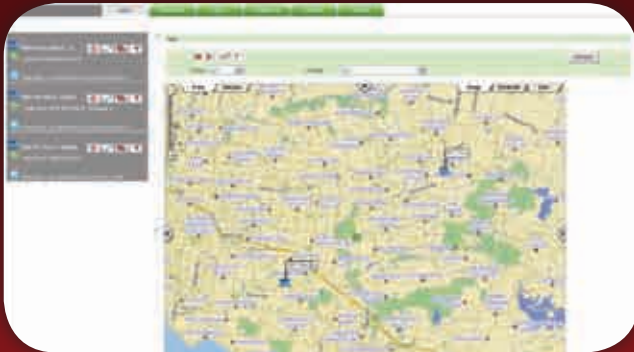

- ✓ Designed for commercial vehicles.
- ✓ Combine state-of-the-art security, self monitoring and tracking, with 24-hour online access.
- ✓ Convert theft prevention and retrieval device.
- ✓ Small, compact design for un-intrusive installation and easy concealment
- ✓ Accurately pin point the current location of your vehicle in a second.
- ✓ Used to reduce the cost of vehicle insurance and premiums while increasing driver efficiency and your return of investment.

Advanced and innovative user interface

Our vehicle tracking system is monitored by Fleet Max's intelligent Central Command software system that actively communicates with the vehicle 24 hours a day, seven days a week, allowing you to personally track and locate your vehicles with just the touch of a button through our comprehensive, user - friendly Fleet Max internet web portal.

LICENSED MAPPING

Fleet Max utilises fully licensed NAVTEQ mapping, including all map upgrades as they become available. Do not risk your business by investment in a tracking system that uses pirated maps illegally.

COMPREHENSIVE REPORTING

Comprehensive range of reports, showing detailed live and historical data in an easy to analyse format.

FULL HISTORY AND PLAY BACK

All information is securely stored for 2 years, and can be easily accessed through the Fleet Max internet web portal.

Replay a vehicles daily activity, analyse present and past data. Better control your actions today with the information from your past.
